PROFESSIONAL SUMMARY RECRUITER FOCUS

Frontend Developer / Junior Frontend Developer Intern at Acacia I.T. Services (Thailand), building business web applications with React, TailwindCSS, and Supabase. I focus on clear, responsive UI and practical frontend data flows with backend teams. My career goal is to grow as a Frontend Developer in a Thai tech company or startup environment.

TECHNICAL SKILLS CORE STACK

Languages & Frameworks

JavaScript (ES6+) React PHP Node.js (basic)

Styling & UI

HTML5 CSS3 TailwindCSS Bootstrap 5

Tools & Version Control

Git GitHub React Vite

Databases & Backend

MySQL Supabase PostgreSQL

Deployment

Vercel Netlify

WORK EXPERIENCE INTERNSHIP

Acacia I.T. Services (Thailand) Co., Ltd. - Junior Frontend Developer Intern

2025 - Present

Frontend development internship focused on business web applications

- Designed and developed a Payroll Management System using React and Node.js for employee and administrator workflows.
- Implemented responsive UI/UX across desktop and mobile layouts with reusable component-based interface patterns.
- Collaborated with the backend team to connect frontend data flow with RESTful API endpoints and application data.
- Used Git and GitHub to manage frontend changes during development.

PROJECTS SELECTED WORK

01 Electronic Parts Stock Management System Inventory platform

Built an electronic parts stock management system to organize inventory data and reduce manual tracking. React Vite powers the frontend, while Supabase handles core data storage.

React Vite MySQL Supabase LINE API QR Code Lazada API

02 Payroll Management System Business web app

Developed payroll workflows for managing employee and salary data in a responsive business web app. React Vite and TailwindCSS support a clean interface for payroll preparation and reporting.

React Vite TailwindCSS XLSX Supabase PostgreSQL

03 Elderly Health Monitoring System Health monitoring platform

Created an elderly health monitoring system to record and review senior care information. PHP and MySQL provide the core application and database structure.
