Summary ABOUT ME

A results-driven Frontend Developer with a Bachelor of Science in Information Systems and Digital Business Innovation (GPA 3.02; Vocational GPA 3.83). Specialises in React and JavaScript with demonstrated experience delivering production-ready applications, including a stock management system, a payroll platform, and an elderly health monitoring system with live API integrations. Committed to continuous professional development and eager to contribute in a collaborative team environment.

Skills TECHNICAL SKILLS

- JavaScript (ES6+), React, Node.js (Basic)
- React Vite, HTML5, CSS3, TailwindCSS (Basic)
- Vercel, Netlify (Basic)
- Git, GitHub, VS Code, npm (Basic)
- PHP, MySQL, Supabase (Basic)

Projects SELECTED WORK

01. Electronic Parts Stock Management System — Inventory & E-Commerce Integration

🔗 github.com/golfApichitGIT

An automotive parts inventory management system supporting QR Code scanning and Lazada API integration for real-time pricing and stock verification.

React Vite MySQL Supabase LINE API QR Code Lazada API

02. Payroll Management System — Web Application

🔗 github.com/golfApichitGIT

A web-based payroll management system enabling Excel file uploads, automated salary calculation, payslip generation, and PDF export for both administrators and employees.

React Vite TailwindCSS React XLSX Supabase PostgreSQL

03. Elderly Health Monitoring System — Care Management Platform

🔗 github.com/golfApichitGIT

A comprehensive senior care platform recording vital health metrics (blood pressure, blood sugar, pulse). Integrated with LINE Bot for automated family notifications and real-time GPS location tracking.

PHP MySQL Bootstrap 5 Chart.js LINE API GPS Tracking

Experience WORK & ACTIVITIES

Junior Frontend Developer (Internship) — Acacia I.T. Services (Thailand) Co., Ltd.

2025 — Present

Internship · Private Company

Designed and developed a Payroll Management System using React and Node.js. · Implemented responsive UI/UX with a focus on usability and accessibility. · Collaborated with the Backend development team to integrate RESTful APIs and manage application data.
